

Exhibitor briefing

The **International Forest Garden / Food Forest Symposium** is a five-day international online gathering of forest gardening and food forest practitioners and academic researchers exploring the current state and future prospects for these sustainable land-use systems.

We would be delighted to welcome you as an exhibitor (ie advertiser) to the virtual event on 31 May to 4 June 2021. We anticipate a good number of **plant nurseries, seed suppliers, course and consultancy providers** will be interested in online advertising by taking a booth.

Summary of virtual booth

Below is a list of features that have been included within the booth (depending on the information you have supplied to us):

- **Customised booth** to showcase your products / services, including:
 - Organisation logo and profile (logo to be supplied in high res jpeg at 600px (width) x 338 px (height))
 - Organisation photo or video can be embedded (please supply a YouTube or Vimeo link for video)
 - Website, email and social media links (Facebook, Twitter, LinkedIn, Instagram, Snapchat) – please provide full URLs.
- **Document storage** for organisation brochures, reports etc which attendees can download (there is no set limit on the number of documents). Please provide in pdf format – maximum 10mb per document.
- **Exhibitors who are full symposium attendees** also have the option to:
 - 1.1 text chat to other attendees
 - 1.1 video calls with other attendees
- **On-demand content:** the platform will be available on demand for one month before the event and for 14 days after the event, so attendees and exhibitors can connect over a long period

Cost of a booth

- **Free for conference attendees.** A ticket for the event is £195. Please register and buy a ticket [HERE](#) then fill in and the return form below with info.
- **£50 if not an attendee.** Please return form with info and we will invoice you for payment.

BOOKING FORM – VIRTUAL BOOTH

Type of booking	<input type="checkbox"/> Booking as an attendee (already registered) <input type="checkbox"/> Booking as a non-attendee (£50)
Organisation name	
Organisation address	
Country	
Website	
Description of organisation / products / services	

Name of contact	
Email	
Facebook	
Twitter	
LinkedIn	
Instagram	
Snapchat	
Video link (link to video at Vimeo, YouTube etc)	

Please email this form back to us along with any logo and organisation jpeg files and pdf attached documents to mail@agroforestry.co.uk

Event overview

Anticipated number of participants: 400-500 (fully virtual)

Conference website: view the conference website [HERE](#)

Speakers: view confirmed speakers on the conference website [HERE](#)

Overview: Bringing together people from five continents, this unique event is the first to gather leading practitioners and researchers to share their knowledge, passion and hopes for the complex agroforestry systems called forest gardens, food forests, home gardens and multistrata systems.

These systems have existed in the subtropics and tropics for thousands of years, but in cooler climates the history is measured in decades and although great strides have been made, there is still a lot to learn and refine.

Climate change due to greenhouse gas emissions is the greatest challenge humanity faces, and agriculture must become carbon negative in the near future. Already the evidence for very significant carbon sequestration and storage in forest garden systems is showing that they may be one of the best ways of combining crop production with carbon storage.

The focus will be on temperate and cool subtropical/Mediterranean systems, both rural and urban, and from very small to large. There will be presentations of current projects, discussions, networking opportunities, and some more philosophical musings about the role of forest gardens for a sustainable future.

With speakers already lined up from Australia, Austria, Chile, Denmark, France, India/USA, Italy, Netherlands, Sweden, UK and USA, this truly international gathering will be an exciting and dynamic meeting of many of the world's leading experts in the field.
