

Northern nuts project - Growing nuts beyond 60° N

We are searching for  
winter-hardy and productive

- Hazelnuts (*Corylus*)
- Walnuts (*Juglans*)
- Hickories & Hicans (*Carya*)
- Chestnuts (*Castanea*)
- Pines (*Pinus*) and Oaks (*Quercus*)

Our aim is to widen the selection of nut trees for Northern climates,  
corresponding to USDA Hardiness Zones 3-4(5).

Some of our findings so far:

- ✓ Lateral-bearing precocious walnuts from Belarus, hardy to -30 °C
- ✓ Heartnut cultivars bred in Atlantic Canada
- ✓ Hazelnuts from former USSR and Chinese breeding programs

**Do you know interesting clones we should try out?  
Contact us for co-operation!**
