

YP: he is funny in a good way, good tips on discovering the taste first

YP: so far the slugs only eat the leaves of siberian peatree and autumn olive

YP: Merci Franck

SG: Me too - plants dangerously fascinating - stop thinking logically when I see a new plant.

SG: I would love Martin and Franck to discuss the Nitrogen fixers - I am designing a new bit of my land and I'd like to

SG: Multiplication des Plantes Fruitières: Ressources végétales

SG: https://www.amazon.fr/Multiplication-Plantes-Fruiti%C3%A8res-Ressources-v%C3%A9g%C3%A9tales/dp/B08N99YM8Z/ref=sr_1_2?__mk_fr_FR=%C3%85M%C3%85%C5%BD%C3%95%C3%91&c2

SG: Thanks, that's a great idea.

SG: Very funny and very interesting - merci Franck

Pv: Some provoking things he is saying, good to think about. But not sure if I agree with everything he says though.

Pv: @Stewart, maybe a good question to ask Martin in the Walnut Bar later today?

Pv: Nicely done presentation! Food for some nice discussions :D

Mv: I love this, great to see someone share their mistakes

CP: accute collectivitis! I think I suffer from that too!

PL: lol @ exclusive news "slugs eat aphids"

YB: Hello, looking forward this talk. Are you here Franck to exchange ?

ME: I'm so happy!!!!

HK: Haha this is fantastic

HK: To bad no Q& A we gota debate the pionering nitrogen fixing species

MC: I'll be there - the walnut tree starts at 1730 (BST) ie half an hour later today

TA: Super Frank, ton style direct et pratique fait mouche

RA: Merci, Franck - merveilleux!

DR: This is great!

DR: James WONG's Grow for Flavour is really good for taste & nutrition values.

CM: Brilliant - enjoyed that!

FW: Very wise words - nothing worse than growing something for 10 years, to be underwhelmed by the vigour, the yi

YE: merci!

YE: Merci,! et aussi pour la version français soutitré!!
