

### Chat record

MH: We'll be in Chile for a small hour :)

MH: Thanks a lot Ricarbol! 🙏

KH: Thank you!

YP: Thank you Ricardo

JB: Many thanks Ricarbol. I will watch this again. So much wonderful information.

CD: Thank you!

HD: The next session will begin shortly. You can access Research on people, forest gardens, and wildlife, by Emma Pilgrim by clicking through the Programme tab.

Ss: Thanks!

JS: Marvellous presentation! Thanks a lot!

ME: the monkey puzzle grows pretty good in europe

DH: Hello again!

DH: Thank you so much Ricarbol, the ancient food forests reminds me too a little of Geoff Lawton's dvideo of discovery of 2000yr old Moroccan food forest. It is so interesting to hear about your old food forests.

JM: Thank

HK: Jubaea chilensis

HK: Jubaea chilensis (mini coconut)

aP: Fantastic presentation Ricardo, thank you so much. To what extent is the Mapuche wisdom and practice being included in the scaling of forest gardens and agroecosystems in Chile?

RV: Thank you everyone!!! With pleasure I will share more info and experiences, so we can talk through message or here in the chat :)

RV: Botanical names:

RV: Pewen (Monkey puzzle tree) - Araucaria araucana, Chilean palm - Jubaea chilensis, Maqui - Aristotelia chilensis, Murta - Ugni molinae, Calafate - Berberis buxifolia, Michay - Berberis darwinii, Keule - Gomortega keule, Chaura - Gaultheria mucronata and ot

RV: Chilco - Fuchsia magellanica, Luma - Amomyrtus luma, Arrayán - Luma apiculata, Chilean hazelnut - Gevuina avellana, Lleuque - Prumnopitys andina, Daudapo - Myrteola nummularia, Miñe-miñe - Rubus geoides, Boldo - Peumus boldus, Huingán - Schinus polygamus

BR: Thanks Ricardo, that's great information and worth a try on more sheltered places!

SI: Hello ..! Good evening from India

ML: Me falta Patagonia & Calafate po !

ML: Thanks a lot !

KS: Thank you!

RT: Could you suggest any fruiting woody species for central europe (cold temperate climate)
