## Plant delivery

We send most plants out in the dormant season: the majority of our plants are sent or can be collected by arrangement between November and March. We sell and send some Mediterranean plants in summer (a separate list is released around June/July).

On ordering, your order will go into a queue for delivery between November and March – we'll give you an estimate of delivery period. We can only send to "proper" postcoded addresses – not to fields, gateways, parks etc. Most UK orders will be sent by carrier – if you are not in then if deemed safe the plants will be left. A mobile tel. no. is useful so you can be sent delivery updates.

**Basic delivery charge** for most of mainland England, Wales, lowland Scotland: **12.5% of order value** (minimum delivery charge £24.00)

**Surcharges** (added to basic delivery charge): Channel Islands + £16.00 (Note we cannot send these genera to Jersey: *Amelanchier*, *Chaenomeles*, *Crataegus*, *Cydonia*, *Eriobotrya*, *Malus*, *Mespilus*, *Pyrus* and *Sorbus*); Isle of Man + £16.00; Isle of Wight + £7.00; Scottish Highlands + £20.00; Scottish Islands & Scilly Isles + £20.00; remote/congested area surcharge +£2.00.

*If you only want a few small plants not including trees please contact us for a postage quote (mail@agroforestry.co.uk).*

*If you're wondering why delivery charges are at the level they are, it is because very few couriers accept plants at all, and those that do also charge a lot extra for longer parcels! The charges this year are unchanged from 2021/2 despite courier prices increasing steeply.*

See our website at [www.agroforestry.co.uk](http://www.agroforestry.co.uk) for \* A great selection of seeds of fruit, trees and unusual edibles \* Books on forest gardening and useful plants \* Courses (online and in-person) on forest gardening, nut crops etc. \* Tours of our research sites in Devon.
